

# SAFETY DATA SHEET

XZ8908-0012

## Section 1. Identification

**GHS product identifier** : GOLD POWDER-1201 - PALE GOLD (RED TONE)  
GOLD POWDER-1201 - PALE GOLD (RED TONE)

**Product code** : XZ8908-0012

**UN number** : UN3077

**Other means of identification** : Not available.

**Product type** : Powder.

### Relevant identified uses of the substance or mixture and uses advised against

**Recommended use** : Paint or paint related material.

**Supplier's details** : Sherwin-Williams (Vietnam) Limited  
Hoa Lan Hamlet,  
Thuan Giao Commune, Thuan An City,  
Binh Duong Province, Vietnam  
(+84) 274- 3747343

THE VALSPAR (Vietnam) Corporation Limited  
No. 104/2-4, Street No. 4, Amata Industrial Park,  
Long Binh Ward,  
Bien Hoa City,  
Dong Nai Province, Vietnam  
(+84) 251 3936 343

**Emergency telephone number** : +1-703-253-4229 (24 hours /365 days)

## Section 2. Composition, information on ingredients

**Substance/mixture** : Mixture

**Other means of identification** : Not available.

### CAS number/other identifiers

**Product code** : XZ8908-0012

| Ingredient name           | CAS number | Chemical formula | %         |
|---------------------------|------------|------------------|-----------|
| Copper Powder - H400/H410 | 7440-50-8  | Cu               | ≥75 - ≤90 |
| Zinc Powder               | 7440-66-6  | Zn               | <10       |

There are no additional ingredients present which, within the current knowledge of the supplier and in the concentrations applicable, are classified as hazardous to health or the environment and hence require reporting in this section.

Occupational exposure limits, if available, are listed in Section 8.

## Section 3. Hazards identification

**Classification of the substance or mixture** : ACUTE TOXICITY (oral) - Category 4  
EYE IRRITATION - Category 2A  
AQUATIC TOXICITY (ACUTE) - Category 1  
AQUATIC TOXICITY (CHRONIC) - Category 1

### GHS label elements

**Date of issue/Date of revision** : 6/18/2022 **Date of previous issue** : 3/29/2022 **Version** : 1.01 1/11

SHW-A4-AP-GHS-VN

## Section 3. Hazards identification

### Hazard pictograms

### Signal word

: Warning

### Hazard statements

: Harmful if swallowed.  
Causes serious eye irritation.  
Very toxic to aquatic life with long lasting effects.

### Precautionary statements

#### Prevention

: Wear eye or face protection. Avoid release to the environment. Do not eat, drink or smoke when using this product. Wash thoroughly after handling.

#### Response

: Collect spillage. IF SWALLOWED: Call a POISON CENTER or doctor if you feel unwell. Rinse mouth. IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing. If eye irritation persists: Get medical advice or attention.

#### Storage

: Not applicable.

#### Disposal

: Dispose of contents and container in accordance with all local, regional, national and international regulations.

### Routes of entry

: Not available.

### Other hazards which do not result in classification

: May form combustible dust concentrations in air. Read Safety Data Sheet Before Use.

## Section 4. First aid measures

### Description of necessary first aid measures

#### Eye contact

: Immediately flush eyes with plenty of water, occasionally lifting the upper and lower eyelids. Check for and remove any contact lenses. Continue to rinse for at least 10 minutes. Get medical attention.

#### Inhalation

: Remove victim to fresh air and keep at rest in a position comfortable for breathing. If not breathing, if breathing is irregular or if respiratory arrest occurs, provide artificial respiration or oxygen by trained personnel. It may be dangerous to the person providing aid to give mouth-to-mouth resuscitation. Get medical attention if adverse health effects persist or are severe. If unconscious, place in recovery position and get medical attention immediately. Maintain an open airway. Loosen tight clothing such as a collar, tie, belt or waistband.

#### Skin contact

: Flush contaminated skin with plenty of water. Remove contaminated clothing and shoes. Get medical attention if symptoms occur. Wash clothing before reuse. Clean shoes thoroughly before reuse.

#### Ingestion

: Wash out mouth with water. Remove dentures if any. If material has been swallowed and the exposed person is conscious, give small quantities of water to drink. Stop if the exposed person feels sick as vomiting may be dangerous. Do not induce vomiting unless directed to do so by medical personnel. If vomiting occurs, the head should be kept low so that vomit does not enter the lungs. Get medical attention. If necessary, call a poison center or physician. Never give anything by mouth to an unconscious person. If unconscious, place in recovery position and get medical attention immediately. Maintain an open airway. Loosen tight clothing such as a collar, tie, belt or waistband.

### Most important symptoms/effects, acute and delayed

#### Potential acute health effects

##### Eye contact

: Causes serious eye irritation.

##### Inhalation

: Exposure to airborne concentrations above statutory or recommended exposure limits may cause irritation of the nose, throat and lungs.

##### Skin contact

: No known significant effects or critical hazards.

## Section 4. First aid measures

- Ingestion** : Harmful if swallowed.
- Over-exposure signs/symptoms**
- Eye contact** : Adverse symptoms may include the following:  
pain or irritation  
watering  
redness
- Inhalation** : Adverse symptoms may include the following:  
respiratory tract irritation  
coughing
- Skin contact** : No specific data.
- Ingestion** : No specific data.

### Indication of immediate medical attention and special treatment needed, if necessary

- Notes to physician** : Treat symptomatically. Contact poison treatment specialist immediately if large quantities have been ingested or inhaled.
- Specific treatments** : No specific treatment.
- Protection of first-aiders** : No action shall be taken involving any personal risk or without suitable training. It may be dangerous to the person providing aid to give mouth-to-mouth resuscitation.

See toxicological information (Section 11)

## Section 5. Fire-fighting measures

### Extinguishing media

- Suitable extinguishing media** : Use dry chemical powder.
- Unsuitable extinguishing media** : Avoid high pressure media which could cause the formation of a potentially explosible dust-air mixture.

- Specific hazards arising from the chemical** : May form explosible dust-air mixture if dispersed. This material is very toxic to aquatic life with long lasting effects. Fire water contaminated with this material must be contained and prevented from being discharged to any waterway, sewer or drain.
- Hazardous thermal decomposition products** : Decomposition products may include the following materials:  
carbon dioxide  
carbon monoxide  
metal oxide/oxides
- Special protective actions for fire-fighters** : Promptly isolate the scene by removing all persons from the vicinity of the incident if there is a fire. No action shall be taken involving any personal risk or without suitable training. Move containers from fire area if this can be done without risk. Use water spray to keep fire-exposed containers cool.
- Special protective equipment for fire-fighters** : Fire-fighters should wear appropriate protective equipment and self-contained breathing apparatus (SCBA) with a full face-piece operated in positive pressure mode.

## Section 6. Accidental release measures

### Personal precautions, protective equipment and emergency procedures

- For non-emergency personnel** : No action shall be taken involving any personal risk or without suitable training. Evacuate surrounding areas. Keep unnecessary and unprotected personnel from entering. Do not touch or walk through spilled material. Shut off all ignition sources. No flares, smoking or flames in hazard area. Avoid breathing dust. Provide adequate ventilation. Wear appropriate respirator when ventilation is inadequate. Put on appropriate personal protective equipment.

## Section 6. Accidental release measures

**For emergency responders :** If specialized clothing is required to deal with the spillage, take note of any information in Section 8 on suitable and unsuitable materials. See also the information in "For non-emergency personnel".

**Environmental precautions :** Avoid dispersal of spilled material and runoff and contact with soil, waterways, drains and sewers. Inform the relevant authorities if the product has caused environmental pollution (sewers, waterways, soil or air). Water polluting material. May be harmful to the environment if released in large quantities. Collect spillage.

### Methods and materials for containment and cleaning up

**Small spill :** Move containers from spill area. Use spark-proof tools and explosion-proof equipment. Avoid dust generation. Using a vacuum with HEPA filter will reduce dust dispersal. Place spilled material in a designated, labeled waste container. Dispose of via a licensed waste disposal contractor.

**Large spill :** Move containers from spill area. Use spark-proof tools and explosion-proof equipment. Approach release from upwind. Prevent entry into sewers, water courses, basements or confined areas. Avoid dust generation. Do not dry sweep. Vacuum dust with equipment fitted with a HEPA filter and place in a closed, labeled waste container. Avoid creating dusty conditions and prevent wind dispersal. Dispose of via a licensed waste disposal contractor. Note: see Section 1 for emergency contact information and Section 13 for waste disposal.

## Section 7. Handling and storage

### Precautions for safe handling

**Protective measures :** Put on appropriate personal protective equipment (see Section 8). Do not ingest. Avoid contact with eyes, skin and clothing. Avoid breathing dust. Avoid release to the environment. Avoid the creation of dust when handling and avoid all possible sources of ignition (spark or flame). Prevent dust accumulation. Use only with adequate ventilation. Wear appropriate respirator when ventilation is inadequate. Keep in the original container or an approved alternative made from a compatible material, kept tightly closed when not in use. Electrical equipment and lighting should be protected to appropriate standards to prevent dust coming into contact with hot surfaces, sparks or other ignition sources. Take precautionary measures against electrostatic discharges. To avoid fire or explosion, dissipate static electricity during transfer by grounding and bonding containers and equipment before transferring material. Empty containers retain product residue and can be hazardous. Do not reuse container.

**Advice on general occupational hygiene :** Eating, drinking and smoking should be prohibited in areas where this material is handled, stored and processed. Workers should wash hands and face before eating, drinking and smoking. Remove contaminated clothing and protective equipment before entering eating areas. See also Section 8 for additional information on hygiene measures.

**Conditions for safe storage, including any incompatibilities :** Store in accordance with local regulations. Store in a segregated and approved area. Store in original container protected from direct sunlight in a dry, cool and well-ventilated area, away from incompatible materials (see Section 10) and food and drink. Eliminate all ignition sources. Separate from oxidizing materials. Keep container tightly closed and sealed until ready for use. Containers that have been opened must be carefully resealed and kept upright to prevent leakage. Do not store in unlabeled containers. Use appropriate containment to avoid environmental contamination. See Section 10 for incompatible materials before handling or use.

## Section 8. Exposure controls/personal protection

### Control parameters

#### Occupational exposure limits

| Ingredient name           | Exposure limits                                                                                                                                           |
|---------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------|
| Copper Powder - H400/H410 | <b>Ministry of Health (Viet Nam, 6/2019).</b><br>TWA: 0.5 mg/m <sup>3</sup> 8 hours. Form: Dust<br>TWA: 0.1 mg/m <sup>3</sup> 8 hours. Form: vapour, fume |

#### Appropriate engineering controls

: Use only with adequate ventilation. If user operations generate dust, fumes, gas, vapor or mist, use process enclosures, local exhaust ventilation or other engineering controls to keep worker exposure to airborne contaminants below any recommended or statutory limits. The engineering controls also need to keep gas, vapor or dust concentrations below any lower explosive limits. Use explosion-proof ventilation equipment.

#### Environmental exposure controls

: Emissions from ventilation or work process equipment should be checked to ensure they comply with the requirements of environmental protection legislation. In some cases, fume scrubbers, filters or engineering modifications to the process equipment will be necessary to reduce emissions to acceptable levels.

### Individual protection measures

#### Hygiene measures

: Wash hands, forearms and face thoroughly after handling chemical products, before eating, smoking and using the lavatory and at the end of the working period. Appropriate techniques should be used to remove potentially contaminated clothing. Wash contaminated clothing before reusing. Ensure that eyewash stations and safety showers are close to the workstation location.

#### Eye/face protection

: Safety eyewear complying with an approved standard should be used when a risk assessment indicates this is necessary to avoid exposure to liquid splashes, mists, gases or dusts. If contact is possible, the following protection should be worn, unless the assessment indicates a higher degree of protection: chemical splash goggles. If operating conditions cause high dust concentrations to be produced, use dust goggles.

### Skin protection

#### Hand protection

: Chemical-resistant, impervious gloves complying with an approved standard should be worn at all times when handling chemical products if a risk assessment indicates this is necessary. Considering the parameters specified by the glove manufacturer, check during use that the gloves are still retaining their protective properties. It should be noted that the time to breakthrough for any glove material may be different for different glove manufacturers. In the case of mixtures, consisting of several substances, the protection time of the gloves cannot be accurately estimated.

#### Body protection

: Personal protective equipment for the body should be selected based on the task being performed and the risks involved and should be approved by a specialist before handling this product.

#### Other skin protection

: Appropriate footwear and any additional skin protection measures should be selected based on the task being performed and the risks involved and should be approved by a specialist before handling this product.

#### Respiratory protection

: Based on the hazard and potential for exposure, select a respirator that meets the appropriate standard or certification. Respirators must be used according to a respiratory protection program to ensure proper fitting, training, and other important aspects of use.

## Section 9. Physical and chemical properties

### Appearance

|                                              |                                                                  |
|----------------------------------------------|------------------------------------------------------------------|
| Physical state                               | : Solid.                                                         |
| Color                                        | : Various                                                        |
| Odor                                         | : Not available.                                                 |
| Odor threshold                               | : Not available.                                                 |
| pH                                           | : Not applicable.                                                |
| Melting point                                | : Not available.                                                 |
| Boiling point                                | : Not available.                                                 |
| Flash point                                  | : Closed cup: Not applicable.                                    |
| Evaporation rate                             | : Not available.                                                 |
| Flammability (solid, gas)                    | : Not available.                                                 |
| Lower and upper explosive (flammable) limits | : Not applicable.                                                |
| Vapor pressure                               | : Not available.                                                 |
| Vapor density                                | : Not applicable.                                                |
| Relative density                             | : 7.49                                                           |
| Solubility                                   | : Not available.                                                 |
| Partition coefficient: n-octanol/water       | : Not applicable.                                                |
| Auto-ignition temperature                    | : Not applicable.                                                |
| Decomposition temperature                    | : Not available.                                                 |
| Viscosity                                    | : Kinematic (40°C (104°F)): >20.5 mm <sup>2</sup> /s (>20.5 cSt) |
| <b>Aerosol product</b>                       |                                                                  |
| Heat of combustion                           | : 0.524 kJ/g                                                     |

## Section 10. Stability and reactivity

|                                    |                                                                                                                                                                                                                                                                                                                                                           |
|------------------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Reactivity                         | : No specific test data related to reactivity available for this product or its ingredients.                                                                                                                                                                                                                                                              |
| Chemical stability                 | : The product is stable.                                                                                                                                                                                                                                                                                                                                  |
| Possibility of hazardous reactions | : Under normal conditions of storage and use, hazardous reactions will not occur.                                                                                                                                                                                                                                                                         |
| Conditions to avoid                | : Avoid the creation of dust when handling and avoid all possible sources of ignition (spark or flame). Take precautionary measures against electrostatic discharges. To avoid fire or explosion, dissipate static electricity during transfer by grounding and bonding containers and equipment before transferring material. Prevent dust accumulation. |
| Incompatible materials             | : Reactive or incompatible with the following materials:<br>oxidizing materials                                                                                                                                                                                                                                                                           |
| Hazardous decomposition products   | : Under normal conditions of storage and use, hazardous decomposition products should not be produced.                                                                                                                                                                                                                                                    |

## Section 11. Toxicological information

### Information on toxicological effects

#### Acute toxicity

Not available.

#### Irritation/Corrosion

| Product/ingredient name | Result               | Species | Score | Exposure          | Observation |
|-------------------------|----------------------|---------|-------|-------------------|-------------|
| Zinc Powder             | Skin - Mild irritant | Human   | -     | 72 hours 300 ug l | -           |

#### Sensitization

Not available.

#### Mutagenicity

Not available.

#### Carcinogenicity

Not available.

#### Reproductive toxicity

Not available.

#### Teratogenicity

Not available.

#### Specific target organ toxicity (single exposure)

Not available.

#### Specific target organ toxicity (repeated exposure)

Not available.

#### Aspiration hazard

Not available.

**Information on the likely routes of exposure** : Not available.

### Potential acute health effects

|                     |                                                                                                                                          |
|---------------------|------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Eye contact</b>  | : Causes serious eye irritation.                                                                                                         |
| <b>Inhalation</b>   | : Exposure to airborne concentrations above statutory or recommended exposure limits may cause irritation of the nose, throat and lungs. |
| <b>Skin contact</b> | : No known significant effects or critical hazards.                                                                                      |
| <b>Ingestion</b>    | : Harmful if swallowed.                                                                                                                  |

### Symptoms related to the physical, chemical and toxicological characteristics

|                     |                                                                                            |
|---------------------|--------------------------------------------------------------------------------------------|
| <b>Eye contact</b>  | : Adverse symptoms may include the following:<br>pain or irritation<br>watering<br>redness |
| <b>Inhalation</b>   | : Adverse symptoms may include the following:<br>respiratory tract irritation<br>coughing  |
| <b>Skin contact</b> | : No specific data.                                                                        |
| <b>Ingestion</b>    | : No specific data.                                                                        |

### Delayed and immediate effects and also chronic effects from short and long term exposure

#### Short term exposure

## Section 11. Toxicological information

**Potential immediate effects** : Not available.

**Potential delayed effects** : Not available.

### Long term exposure

**Potential immediate effects** : Not available.

**Potential delayed effects** : Not available.

### Potential chronic health effects

Not available.

**General** : Repeated or prolonged inhalation of dust may lead to chronic respiratory irritation.

**Carcinogenicity** : No known significant effects or critical hazards.

**Mutagenicity** : No known significant effects or critical hazards.

**Teratogenicity** : No known significant effects or critical hazards.

**Developmental effects** : No known significant effects or critical hazards.

**Fertility effects** : No known significant effects or critical hazards.

### Numerical measures of toxicity

#### Acute toxicity estimates

| Route | ATE value    |
|-------|--------------|
| Oral  | 561.17 mg/kg |

## Section 12. Ecological information

### Toxicity

| Product/ingredient name   | Result                             | Species                                                                  | Exposure |
|---------------------------|------------------------------------|--------------------------------------------------------------------------|----------|
| Copper Powder - H400/H410 | Acute EC50 1100 µg/l Fresh water   | Aquatic plants - Lemna minor                                             | 4 days   |
|                           | Acute EC50 2.1 µg/l Fresh water    | Daphnia - Daphnia longispina - Juvenile (Fledgling, Hatchling, Weanling) | 48 hours |
|                           | Acute IC50 16 µg/l Fresh water     | Algae - Chlorella pyrenoidosa - Exponential growth phase                 | 72 hours |
|                           | Acute IC50 5.4 mg/l Marine water   | Aquatic plants - Plantae - Exponential growth phase                      | 72 hours |
|                           | Acute LC50 0.072 µg/l Marine water | Crustaceans - Amphipoda - Adult                                          | 48 hours |
|                           | Acute LC50 7.56 µg/l Marine water  | Fish - Periophthalmus waltoni - Adult                                    | 96 hours |
|                           | Chronic NOEC 2.5 µg/l Marine water | Algae - Nitzschia closterium - Exponential growth phase                  | 72 hours |
|                           | Chronic NOEC 7 mg/l Fresh water    | Aquatic plants - Ceratophyllum demersum                                  | 3 days   |
|                           | Chronic NOEC 0.02 mg/l Fresh water | Crustaceans - Cambarus bartonii - Mature                                 | 21 days  |
|                           | Chronic NOEC 2 µg/l Fresh water    | Daphnia - Daphnia magna                                                  | 21 days  |
| Zinc Powder               | Chronic NOEC 0.8 µg/l Fresh water  | Fish - Oreochromis niloticus - Juvenile (Fledgling, Hatchling, Weanling) | 6 weeks  |
|                           | Acute EC50 10000 µg/l Fresh water  | Aquatic plants - Lemna minor                                             | 4 days   |
|                           | Acute IC50 65 µg/l Marine water    | Algae - Nitzschia closterium - Exponential growth phase                  | 4 days   |
|                           | Acute LC50 65 µg/l Fresh water     | Crustaceans - Ceriodaphnia dubia - Neonate                               | 48 hours |
|                           | Acute LC50 68 µg/l Fresh water     | Daphnia - Daphnia magna                                                  | 48 hours |

## Section 12. Ecological information

|  |                                     |                                         |          |
|--|-------------------------------------|-----------------------------------------|----------|
|  | Acute LC50 12.21 µg/l Marine water  | Fish - Periophthalmus waltoni - Adult   | 96 hours |
|  | Chronic EC10 59.2 µg/l Fresh water  | Daphnia - Daphnia magna                 | 21 days  |
|  | Chronic NOEC 0.25 mg/l Marine water | Algae - Ulva pertusa                    | 96 hours |
|  | Chronic NOEC 9 mg/l Fresh water     | Aquatic plants - Ceratophyllum demersum | 3 days   |
|  | Chronic NOEC 178 µg/l Marine water  | Crustaceans - Palaemon elegans          | 21 days  |
|  | Chronic NOEC 2.6 µg/l Fresh water   | Fish - Cyprinus carpio                  | 4 weeks  |

### Persistence and degradability

Not available.

### Bioaccumulative potential

Not available.

### Mobility in soil

Soil/water partition coefficient ( $K_{oc}$ ) : Not available.

Other adverse effects : No known significant effects or critical hazards.

## Section 13. Disposal considerations

**Disposal methods** : The generation of waste should be avoided or minimized wherever possible. Disposal of this product, solutions and any by-products should at all times comply with the requirements of environmental protection and waste disposal legislation and any regional local authority requirements. Dispose of surplus and non-recyclable products via a licensed waste disposal contractor. Waste should not be disposed of untreated to the sewer unless fully compliant with the requirements of all authorities with jurisdiction. Waste packaging should be recycled. Incineration or landfill should only be considered when recycling is not feasible. This material and its container must be disposed of in a safe way. Care should be taken when handling emptied containers that have not been cleaned or rinsed out. Empty containers or liners may retain some product residues. Avoid dispersal of spilled material and runoff and contact with soil, waterways, drains and sewers.

## Section 14. Transport information

|                            | UN                                                                                                                                                                           | IMDG                                                                                                                                                                         | IATA                                                                                                                                                                             |
